- Figma
- HTML/CSS
- Design Systems

Education

2020 - 2022

Engineering and Applied Science Program

Chiang Rai Municipality School 6

2023 - present

Software Engineering

University of Phayao

Career Objective

To leverage my skills in user experience and user interface design to create intuitive, user-centered designs that enhance user satisfaction and engagement. With a deep understanding of design principles, user research, and prototyping tools, I aim to contribute to innovative digital products while working collaboratively with cross-functional teams to deliver seamless and impactful experiences.

Projects

Coffee bean sales website   2022

- **Project name**: Peedee Coffee roaster
- **Details**: Designing a website for a friend's coffee shop in the group to sell coffee beans online.
- **Tools**: Figma
- **Responsibilitie**: Created wireframes for the product listing page, product details page, and shopping cart.

Plant sales app   2022

- **Project name**: Plantify
- **Details**: An app for selling small potted plants for home decoration. It offers a variety of indoor plants in decorative pots.
- **Tools**: Figma
- **Responsibilitie**: Designed the main page of the app to display an initial selection of products. Created a prototype to showcase product details, track 'like' status, and enable users to add items to the shopping cart.

IT equipment sales app   2022

- **Project name**: Center of the Universe
- **Details**: It is an app that aggregates IT products, providing users with an easy way to browse and shop for a variety of technology-related items.
- **Tools**: Figma
- **Responsibilitie**: Designed wireframes for the product categories page and product details page, focusing on layout structure and user flow. Created interactive prototypes for both pages to showcase the user experience and functionality.
